

GRANTHIK SOM

Software Developer | Mobile Application Developer | Flutter Developer
Jaipur, Rajasthan, India | +91 7908490678 | granthiksom@gmail.com | github.com/GranthikSom

PROFESSIONAL SUMMARY

Software Developer with hands-on experience across the full application development lifecycle, including UI/UX design, state management, REST API integration, backend development, and testing. Skilled in cross-platform mobile application development using Flutter and Dart, with additional experience in Dart Frog backend development, JavaScript, and React. Strong foundation in Clean Architecture, Object-Oriented Programming, and Data Structures, with a track record of independently building and shipping complete, scalable applications from architecture through deployment. Effective at problem-solving, debugging, and collaborating through Git-based version control workflows.

TECHNICAL SKILLS

Programming Languages: Dart, Python, JavaScript, C

Mobile and Frontend Development: Flutter (Android, iOS, Web), Cross-Platform Development, React

State Management: Provider, BLoC, Cubit, GetX

Backend and APIs: Dart Frog, REST APIs, API Integration, JWT Authentication, Firebase (Auth, Firestore, Storage), Database Management, JSON

Testing and Quality: flutter_test, Unit Testing, Widget Testing, Mockito, Debugging

Software Engineering Practices: Clean Architecture, Repository Pattern, Object-Oriented Programming, Data Structures, Scalable Application Design, Agile Development

Tools and Version Control: Git, GitHub, GitHub Actions, CI/CD, Shell Scripting, Android Studio, VS Code, Application Deployment

PROJECTS

Sedo - Motorcycle Dashboard Application

Flutter, Dart, Provider, Google Maps SDK, audioplayers, image_picker | github.com/GranthikSom/sedo

- Developed a cross-platform Flutter application with 6 integrated screens combining GPS navigation, speedometer, audio playback, and camera capture, consolidating 3 or more separate rider applications into a single dashboard.
- Integrated Google Maps SDK and audioplayers using Provider-based state management across all screens, applying a clean service-layer architecture to keep third-party dependencies decoupled and maintainable.

Musix - Full-Stack Music Streaming Platform

Flutter, Dart, Dart Frog, Provider, JWT, audio_service | github.com/GranthikSom/musix

- Built a full-stack music streaming platform consisting of a Flutter client and a self-developed Dart Frog backend, delivering REST API endpoints for authentication, songs, playlists, and file uploads.
- Implemented JWT authentication with bcrypt password hashing to secure user accounts and protect API access.
- Engineered a background-isolate file scanner for on-device audio indexing and a dedicated service layer to separate playback state from the UI, maintained across a 50-commit feature-branch Git workflow.

VerticalBar - Featured Ubersicht Widget (Open Source)

JavaScript, React, Shell Scripting, macOS | github.com/GranthikSom/VerticalBar | tracesof.net/uebersicht-widgets

- Built a high-performance workspace sidebar widget for the Ubersicht platform on macOS with AeroSpace window-manager integration, selected for inclusion in the official Ubersicht Widget Gallery.
- Designed an event-driven architecture using AeroSpace callbacks to eliminate background polling, achieving near-zero idle CPU usage and improving application performance.
- Implemented multi-monitor workspace tracking with automatic macOS application icon extraction and caching, plus real-time system status indicators for battery, Wi-Fi, and audio.

EDUCATION

B.Tech, Computer Science and Engineering - University of Engineering and Management (UEM), Jaipur

Expected July 2027

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, Software Engineering

ACHIEVEMENTS

- Featured in the official Ubersicht Widget Gallery (tracesof.net/uebersicht-widgets) for the VerticalBar workspace sidebar widget, recognized among open-source community contributions.
